Option Strategy Plots provided by Dash Financial Technologies LLC

*Greeks are mathematical calculations used to determine the effect of various factors on options.

Options trading entails significant risk and is not appropriate for all investors. Prior to trading options, you must receive a copy of [Characteristics and Risks of Standardized Options](#), which is available from Fidelity Investments, and be approved for options trading. Supporting documentation for any claims, if applicable, will be furnished upon request.

For options traded on an Exchange, Fidelity will attempt to show better price indications and provide better fills for your orders than those available by trading in the individual legs.

Certain market conditions may impact eligibility for NBBO pricing, including orders entered during fast market conditions, orders entered when a security has halted trading, and orders entered when circumstances result in a non-firm quote condition.

News, commentary, data, charts, research reports, ratings and analyst opinions and other information provided on this page are provided by third-parties unaffiliated with Fidelity and are intended for research purposes to help self-directed investors evaluate many types of securities. All information supplied or obtained from this page is for informational purposes only and should not be considered investment advice or guidance, an offer of or a solicitation of an offer to buy or sell a security, or a recommendation or endorsement by Fidelity of any security or investment strategy. Fidelity does not endorse or adopt any particular investment strategy, any analyst opinion/rating/report or any approach to evaluating individual securities. Fidelity makes no guarantees that information supplied is accurate, complete, or timely, and does not provide any warranties regarding results obtained from its use.
